

FEATURES

MMP180

- ◆ Manual Polarimeter, wide range ($\pm 180^\circ$).
- ◆ Easy to operate, the instrument is suitable for determining the optical rotation of optical compound solution.
- ◆ Measurement accuracy: $\pm 0.05^\circ$.
- ◆ Disc polarimeter with a standard sodium lamp splits light into ordinary and extraordinary rays. Users observe a field of view through the eyepiece, adjust the instrument to the zero point while measuring the dial's value, and calculate a substance's optical rotation.
- ◆ This value helps determine purity, Concentration, Content and Specific Rotation.
